DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 10, 17, 19-22, 26-30, 35, 42, 44, 45, 47, and 51-53 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,914,956 (hereinafter referred as "Williams").

Williams discloses the invention (**claims 1-5, 10, 17, 19-22, 26-30, 35, 42, 44, 45, 47, and 51-53**) as claimed including a method for copying data from an ATM connection table, comprising:

- (a) monitoring an ATM connection table on an ATM network (see Fig. 4, element 478, col. 5, lines 9-12);
- (b) determining whether entries of the ATM connection table are active (see Fig. 4, element 478, col. 5, lines 12-16);
- (c) periodically transferring data from active entries of the ATM connection table to memory (see Fig. 4, col. 8, lines 55-61);
- (d) utilizing identifiers associated with the data for identification purposes (see Fig. 4, col. 5, lines 9-12);
- (e) utilizing the transferred data in the memory with an application program (see Fig. 4, col. 8, lines 55-67).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained through the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 8, 9, 33, and 34 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 5,914,956 (hereinafter referred as "Williams") in view of US Patent 6,195,352 (hereinafter referred as "Cushman").

Regarding claims 8, 9, 33, and 34, Williams does not disclose statistical information. However, Cushman discloses the statistical information (see Fig. 3, element 311, col. 6, lines 14-17). At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine the statistical information teaching by Cushman with Williams. The motivation for doing so would have been to provide to identify the number of cells received on each channel read on column 9, lines 49-50. Therefore, it would have been obvious to combine Cushman and Williams to obtain the invention as specified in the claims 8, 9, 33, and 34.

Allowable Subject Matter

5. Claims 6, 7, 11-16, 18, 23-25, 31, 32, 36-41, 43, 46, and 48-50 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
